

# MAGNETIC STICKER

MANUAL

## THE RIGHT UNDERGROUND/ PREPARATION

### Flat / smooth

Groovy Magnets magnetic stickers adhere to almost any smooth surface such as: metal, wood, glass, cardboard, paper, plastic, kitchen cupboards, smooth painted walls and doors.

If necessary, smooth and sand down any bumps. Small bumps or unevenness in the surface can remain visible through the sticker after applying.

*Slightly sandpaint walls and doors on acrylic basis or coatings. Let a freshly painted wall dry for at least two weeks before applying the wall stickers.*

### Use indoors

Groovy Magnets magnetic stickers are suitable for use indoors.

### Clean

Degrease the surface with lukewarm water and cleaning vinegar. Rinse again with lukewarm water. Do not use ammonia when cleaning because it can affect the adhesive of the sticker.

## APPLICATION

### Avoid air tunnels

Stick the sticker on the wall within 2 hours after removing it from the packaging. When a rolled-up sticker is opened, air tunnels may occur in the backing sheet which can dry out the adhesive layer.

*TIP: In the rare case that the sticker would not adhere well to the substrate, we recommend supplementing with ready-to-use wallpaper adhesive. All information about the right glue can be found on our website: [www.groovymagnets.com](http://www.groovymagnets.com)*

### Stick it on

First remove part of the top of the backing sheet from the sticker. Position the sticker on the surface and press firmly. Now gently pull the back sheet further downwards and work your way to the bottom. Meanwhile, rub the sticker firmly with a soft cloth or a (soft) pressure roller.

### REMOVE the sticker

Warm the sticker with a hairdryer and carefully peel it off bit by bit. **Always keep heating every piece well.**

Depending on the substrate or the quality of the painted surface, it will be easier to remove the sticker. The longer the sticker is on a substrate, the more firmly it sticks. For a smooth painted surface removing will be easier than for a wallpapered wall.

### APPLY the sticker

To ensure that the glue sticks properly to the wall, a hair dryer comes into play. Heat the front and the edges of the sticker with a hair dryer and press firmly. The heat makes the glue supple and gives optimum adhesion.

## CARE & USAGE

### Cleaning the sticker

All our stickers are water-resistant. Clean with a damp cloth and a drop of washing-up liquid.

Remove stubborn streaks with a **magic eraser (melamine sponge)** and a drop of washing-up liquid.

### Writable stickers

Check the product page on our website for the right use of writing material suitable for your type of sticker.
